

Activities in ongoing projects:

1. (Kala-atlas), Finnish Fish-Atlas, the register of fish stocks in Finland. The aim of the project is to keep and update a database on commercially exploited or threatened fish species and stocks, their distribution, status and present management actions in Finland.

2.(VELMU), The Finnish Inventory Programme for the Underwater Marine Environment

http://www.rktl.fi/english/fish/environment_of_fish/coastal_reproduction_areas/fish_a_s_part.html

The aim of the project is to develop appropriate methods for mapping spawning and larval areas in Finnish coastal regions and to produce maps of reproduction areas.

3. Kvarken harr, Grayling (*Thymallus thymallus*) in the Northern Quark in the Baltic Sea.

The aim of the project is to determine the reproduction areas, the spawning and larval habitat requirements to restore the sea spawning grayling stocks.

4. Balance, ("Baltic Sea Management – Nature Conservation and Sustainable Development of the Ecosystem through Spatial Planning")
